The lowest team having weight will be the last points given based on the point's structure. All remaining teams that fished but did not weigh fish will receive one-half ($\frac{1}{2}$) of the next possible points based off the point structure. Example: The last team weighing fish in a 45-boat field ended at 40th place with 2.0 lbs. They would receive 60 points + 2.0 lbs = 62 points.
